Decision Stories – Why Daptiv?

Interview with Sergei Bazhin, Project Manager

What drove your company to look into a collaborative business software? What were your motivations, and what were your business needs?

Teradata is a Business Intelligence (BI) company and the leading provider of Enterprise Data Warehouse (EDW) solution (according to Gartner).

Substantial part of business are Professional Services aimed to perform BI and EDW projects implementation for our Customers.

We were looking for a PPM/collaboration solution that could support our project activities for distributed teams.

What process did you go through to select a vendor?

We were going through detailed PPM market analysis and then used weighted scoring model to select a vendor.

In addition to Daptiv, did you look into other collaborative business software providers? If so, which ones did you look into and why didn't you choose them?

Of course. To name just a few @Task, TeamCentral, Team Manager v 3.0, PPM (ProjectArena), Team Space, Project On Demand, Quick Base, OpenAir, and Zoho Projects.

Daptiv offers more functionality and a better usability.

Why did you choose Daptiv?

Best in class - usability and functionality.

What do you like most about Daptiv (benefits of product, why Daptiv as a company is unique)?

So far the product. Hoping for a good support services.
