

Integrate with Daptiv

If you're like a lot of businesses, you want your PPM system to talk to your other systems – such as ERP, CRM or Financial Systems – or to other tools. Daptiv Connect, our on-demand integration service, brings you a library of 150+ pre-built connectors to make your integrations faster to create, more powerful and less brittle than custom code.

The Power of Daptiv Connect[™]

Take Daptiv Work Intelligence[™] to the next level – bring data from multiple systems into the Daptiv environment, tie it to relevant projects, and use Daptiv PPM reports and dashboards for even more visibility across your business.

Integrate packaged software with on-demand software, or multiple on-demand applications with each other.

Faster, more comprehensive and more reliable than custom code-based integrations.

Pre-built connectors can get updated automatically when there's an upgrade on either side.

Combine Daptiv Connect with Dynamic Applications to increase the success of your integrations.

Examples of 150+ Pre-built Connectors:

SAP | Salesforce | Great Plains | SQL | LDAP | SAS | NetSuite

Daptiv Connect is powered by Pervasive Software

Get Connected:

Daptiv Connect is available now. Pricing for the service includes a setup fee based on your integration requirements, plus a monthly fee per connector. Contact your Account Manager or Sales Representative for more information.
